DEPARTMENT OF FISHERIES  
OTTAWA

SALT FISH DE LUXE

1 lb. package of boned cod or other Can-  
adian fish salted like salmon or herring  
1/2 cup of water 2 hard-boiled eggs  
1/2 tsp. of pepper 1 tsp. of dry mustard

Fish

Turn three-quarter cup of hot  
water which has been heated  
over fish until it is hot enough to  
plaster or shadow the fish. Sprinkle  
with salt, pepper, mustard and  
half teaspoon of pepper. Chop  
the hard-boiled eggs fine and mix  
grociously with butter. Serve with  
tomato sauce.

ANY DAY A FISH DAY

## The Town Election.

The outcome of the voting on  
Monday for Councillors or the  
Town resulted:

Anderson	44
Hardwick	62
Haworth	41
Mayer	67

## Sporting Notes.

Onoway's packsters came down  
to Stony on Sunday and played  
our Senior hockey team on local  
ice. Despite the lack of ice on  
the localities did not experience  
much difficulty in cleaning up to  
the visitors to the tune of 3-0.  
Mr. Enders was in his usual place  
in goal for Stony and succeeded  
in stopping everything which came  
his way.

## Where to Take Your Porkers

The attention of hog-raisers is  
drawn to the fact that they now  
have another outlet for their pro-  
ducts in the recently-opened plant  
in Edmonton, by Canada Packers.  
Give the Packers a trial with  
your next truckload of hogs and  
note the difference.

## Free Show, Saturday Next

Visitors to the City on Saturday  
next will be interested in knowing  
that a free entertainment, moving  
pictures, will be given by McCormick-Deering Implement Co. on  
power farming. The entertain-  
ment is being held in the I. H. C.  
showrooms, and begins at 10 a.m.  
Every phase of power farming  
will be dealt with by trainees  
men. The pictures to be shown are  
said to be of a high-class char-  
acter.

## At the Bonspiel.

All eyes are centered on the  
quarter of Sud-busters which are  
representing Stony Plain at the  
bonspiel in Edmonton this week  
of the Northern Alberta Curling  
Association. The combined force  
of the local curlers have been de-  
voted, this season, to picking and  
choosing the best obtainable ma-  
terial to represent this town at  
the big competition. It is now  
several years since the Sud-busters  
put Stony Plain on the curling  
map, and it is hoped the present  
delegation will not fail their sup-  
porters.

## The John Deere Celebration.

Have you received your tickets  
for the John Deere big film show-  
ing in Kelly's Hall on Saturday,  
February 20. This occasion is the  
John Deere Centennial, celebra-  
ting the making of the first iron  
plow. This film is one you will  
be willing to give money to see.

There are four pictures—an all-  
Hollywood production that will  
take you back to a village black-  
smith shop of 1837 where John  
Deere is building his first steel  
plow.

The second, a historical picture  
of a great industry and a great  
nation growing up together.

A third picture of the romance  
of a young farm boy and girl who  
plan to start farming for them-  
selves; and

The 4th picture, a news reel  
showing the new John Deere Im-  
plements for 1937 at work in the  
field.

# HARDWICK'S YOUR HOME TOWN STORE.

THE WAFFLE-KNIT COMFY-SNUGS have  
wool for extra warmth, balance cotton for  
long wear; small, medium, large. Per set, 98c.  
KLEENEX, used as a kerchief for colds, influ-  
enza and other germ contagion, as well as for  
removing facial creams; 200 tissues to a box;  
per box, 19c.

BLACK TIE OXFORDS; low heels have rubber  
lifts; an ideal shoe for school or play.  
Sizes 8 to 10 1/2, per pair, \$1.75.  
Sizes 11 to 2, per pair \$1.95.

MEN'S Black Velour Side Blucher Oxfords;  
leather insoles; dressy and comfortable; sizes  
6 to 10 1/2; special value, \$2.50 pair.

GROCERY SPECIALS-Rex Cheese 2 lb. box 42c  
Squirrel Brand Peanut Butter, No. 2 tin 29c.  
Australian Recleaned Currants, 2 pounds 29c.  
Beehive Syrup, No. 5 tin, 45c.  
Fresh Roasted Coffee, per pound 25c.

## Get It at HARDWICK'S. AGENTS ALBERTA DAIRY POOL.

# ENDERS BROS., GENERAL MERCHANTS, STONY PLAIN.

We beg to announce that we have  
opened

**A General Store**  
in the Kelly Building, Stony Plain,  
and would be pleased to have you  
give us a call, and look over the  
quality of the goods on display.

**Enders Bros., General Merchants,**  
STONY PLAIN, ALBERTA.

## Protecting Democracy

Great Britain, to and with Great Britain the other units which comprise the British Empire, to to-day the outstanding exponent of the democratic form of government which her people have developed over a thousand years, as the most satisfactory form of administration—self-government.

It is a form of government which has evolved from trial and error over a long period of successive experimentation resulting as Tennyson has aptly pointed out in freedom "which has slowly broadened down from precedent to precedent." In other words, democracy as the British peoples enjoy it, is a structure which has been built up step by step as conditions and demands have required at successive stages.

It can be admitted without hesitation that democratic government has its weaknesses and will continue to present facets of disadvantage to the gods who sit on Olympic heights and gaze down upon human endeavors until the day, if ever, when mankind becomes perfect. The point, however, is that this heritage of democracy and the freedom on which it is based has become a very precious thing to the people of Anglo-Saxon origin, no matter in what part of the globe they may be domiciled. It is a heritage that has become built into the fibre of the British people and one which they can be counted upon to fight to the last ditch to preserve.

Yet conditions the world over to-day appear to conspire to endanger the continued existence of the right of the British people to govern themselves and of that of other countries which have adopted a self-expression type of administration.

Right and left wing European countries are again engaged in a mad scramble to build up powerful war machines, each one trying to outdo an imaginary opponent or group of opponents, resulting in the construction of such a terrifying aggregation of armaments of such tremendous destructive potentialities as to thoroughly alarm the democratic countries, who to-day find their armies and equipment practically impotent in comparison, and to force them into the mad competition, if only for purely defensive necessity.

Already some of the countries which started the race for martial supremacy have at their command forces which far exceed, numerically and in power, anything that was unleashed in the Great War of 1914-18 but also overshadow the effective defensive machines of the democratic countries, of which Great Britain is the recognized leader on the other side of the Atlantic.

The very existence of such tremendous fighting machines constitute a serious menace to the peace of Europe and perhaps of the whole world, for democracies have avowedly no militarization that would sooner or later be dragged into a conflict involving one of the most important continental powers and that if they are unprepared for defense, if not for aggression, they are inviting disaster, involving possibly a complete rout and disintegration of democracy.

This, at any rate, is the attitude and the viewpoint of the British people at the moment and they are hastily mending their weak fences at considerable expense to the taxpayers, so that they may not be caught off guard and impotent. As chief exponent and custodian of democracy in Europe they realize that they have something important to protect, not only for themselves but for others.

With the League of Nations now little better than a broken prop the British recognize they must rely upon themselves and their own resources of men, munitions and equipment for the defence of democracy in Europe, should necessity for defence arise, and they have reasonable grounds for fear that such occasion may be precipitated in view of the aggressive and militant trend which is being displayed in some of the continental countries. They have also come to a realization that the arm upon which their defence rested so surely in the past—the navy—would be little or no assistance to ward off attack from the air. And this is the source from which attack must be expected, if an attack comes, in the light of the great strides which have been made in military aeronautics in the past few years, and the huge aerial forces which have been built up and are being augmented as fast as men and mechanical equipment can turn them out.

### Motor Accidents In U.S.

Deaths Reach A Total Of 88,500  
In 1936

Motor vehicle accident deaths in the United States reached record total of 88,500 in 1936, the National Safety Council said, exceeding the previous mark of 87,000 set in 1935.

Tornadoes, floods, excessive heat and increased employment helped push the 1936 total of accident deaths from all causes to 111,000, wiping out the 1934 record of 101,139.

The council added that accidents permanently disabled about 400,000 persons and temporarily disabled 10,300,000 others.

Council figures showed that while traffic deaths increased four per cent in number, automobile registration jumped eight per cent over the 1935 total to 28,270,000, "a greater number than ever before travelled American streets and highways," and that these vehicles travelled 225,000,000 miles, or 22,000,000,000 more than in any other recorded year.

Lions use a summons card, a bird-like whistle, to communicate with one another during movements in which stealth is required.

OTTAWA, Ont.

### The World's Airlines

Remarkable Increase In Mileage  
During Last 17 Years

Recent statistics for the mileage of air-lines in operation throughout the world now bring the total to a figure approaching 300,000. Seventeen years ago, when the first commercial services were established, the total of the world's air routes was not much over 3,000. In the following year, however, it jumped to nearly 10,000. By 1921 it was over 12,000. While in 1924 it had reached the 20,000 mark. After this it rose steadily to the present figure.

### Substitute For Olive Oil

English Wool Manufacturers Using  
One Evolved From Peanuts

The war in Spain has brought opportunity to the peanut. And the peanut has made good in a big way. When Spain's dwindling supply of olive oil caused the price to run up to \$450 a ton, woolen manufacturers in England, who use the oil extensively, searched for a substitute. Walter Garner, a chemist of Bradford, has evolved one from peanuts which is declared to be as efficient, yet costing only \$250 a ton.

From the standpoint of history, birds have been of practical use to mankind in carrying messages since the earliest days.

### The King's Honors List

Queen Elizabeth's Name Is First In  
New Reign

First honors in the first honors list of the new reign go to Queen Elizabeth.

On her majesty, the king conferred the title of Dame Grand Cross of the Royal Victorian Order. Of the same order the queen was also appointed grand master.

The Duke of Gloucester, Kent and Connaught, Prince Arthur of Connaught, the Earl of Athlone and Harewood and Lord Louis Mountbatten, all members of the royal family, were appointed personal aides-de-camp to the king. The Duke of Gloucester was granted a commission in the Royal Navy as Vice-admiral in the Royal Air Force.

Lord Greenwood, a native of Whitchurch, Ont., with a viscountcy heads the list of peers, baronets and knights appearing in the deferred new year's honors. But he is the only Canadian and for long has been a resident of the United Kingdom. As on the previous occasion, the birthday honors of King Edward VIII, no Canadian list was included. A number of knighthoods went to India. Australia and New Zealand were the only dominions appearing. Newfoundland, which is under a commission of government, drew some minor honors.

Lord Greenwood left Canada at the age of 25, with little in the way of money or practical experience but with a wealth of ambition. Once in England, he struggled to make ends meet while completing his legal education. Then his rise was rapid, as a lawyer, member of parliament and member of the cabinet.

### Odd Police Record Set

Rajway Officer Served Forty Years  
Without Making Arrest

William C. Spinks, of London, who has just retired after 40 years of service, is recalled as one of the most important police officers in Ontario. In Great Britain, he boasted a record probably unequalled anywhere in the world.

During the whole of this period he never made an arrest. "Prevention is better than cure," he says, "and I shall always maintain that a good police officer can prevent crime." His colleagues agree that he could. He used to talk so convincingly and so humanly to offenders that they would abandon whatever criminal project they were contemplating and try going straight.

A jeweled watch is expensive, not because of the intrinsic value of the stones used, but because of the work involved in the setting of the stones, a task of extreme precision.

There are at least 26 species of flying animals in Australia.

## It's the "Request Number"

Ogden's Fine Cut is the "hit"!—That's why it's the "request number" on every roll-your-owner's program. Call for this better tobacco yourself, and enjoy the cool, smooth, satisfying cigarettes you make—they are next best to "tailor-mades".

You'll like the purple easy-opening ribbon on the Ogden's package.

And of course, you should use the best papers, "Chantecleer" or "Vogue".

## OGDEN'S FINE CUT

P.S.—Your Pipe Knows Ogden's Cut Plug.

French, as a rule, eat nothing until midday, except a roll with a cup of chocolate upon arising.

The zebu is the Orient's principal yielder of milk.

For legal consideration, copyright notices must appear on the title page or the one immediately following it. If such notices appear on the last page of a book they are without effect.

## ROYAL HOUSEHOLD FLOUR "NAME the PICTURE" CONTEST

**\$1330.00  
IN CASH PRIZES**

First Prize . . . . . \$100.00

Second Prize . . . . . 25.00

Third Prize . . . . . 15.00

5 Prizes of \$5.00 each . . . . . 25.00

78 Prizes of \$2.50 each . . . . . 195.00

GRAND PRIZE \$250.00

### 259 CASH PRIZES

This is what you do:

Sugge a good name for the picture shown above and fold the name and address and mail it with a substantial cash prize.

"Fisher-man's Luck" might be the title, or "Two Bits at Once." Suggest any name you like and appropriate title. This is "Royal Household" Flour Contest "A" in a series of three "Name-the-Picture" contests. 86 Cash Prizes will be awarded. The First Prize of \$250.00 for the best suggestion of all. Enter today.

**RETAILERS:** You share in this, named by the three first prize winners, and the name of the Grand Prize, will receive \$25.00.

The Ogilvie Flour Mills Co., Limited, Montreal, Quebec; Ogilvie Flour Mill, Winnipeg, Manitoba; Ogilvie's Red Mill, Calgary, Alberta; Ogilvie's, Vancouver, British Columbia.

### "Royal Household" Wins Every Time

The superior bread, cakes and pie you make with Royal Household Flour are the result of a unique and natural process.

"Royal Household" is triple-tested for quality during milling and for having good eating qualities. It just to live better results.

**Follow these simple rules:**

1. Write your title on the coupon for the contest and attach your name and address and that of your dealer.

2. With each title send the words "Name-the-Picture" and the name of the flour used.

3. You may send as many different titles as you like, but each must be accompanied by a section of the leaflet.

4. All entries will close March 6, 1937.

5. All entries must be post-marked not later than March 6, 1937.

5 Address your suggestion to "Name-the-Picture" Contest, The Ogilvie Flour Mills Co., Limited, and mail it to the contest committee.

6. This contest is restricted to RESIDENTS OF CANADA ONLY.

7. The Ogilvie Flour Mills Co., Limited and their families are not eligible to win.

8. In case of a tie, the prizes will be equally divided. The committee of judges will be the final authority in all cases.

9. No correspondence will be answered.

# Reduction In World Stocks Of Grain Is Striking Feature Of World's Wheat Situation

The reduction in world stocks of wheat from the high levels prevailing from 1929 until 1933 is probably the most striking feature of the present wheat situation. The Agricultural Situation and Outlook for 1937, which has just been issued, states: "For the 1936-37 season, it is evident that there will not be the wide margin between world exportable supplies and probable import requirements which existed in previous seasons between 1929 and 1934." The same world stocks were brought about by a succession of comparatively short crops, particularly in North America.

The total wheat harvest in 1934, exclusive of Russia and China, is estimated at 88 million bushels below the 1935 total. The fact that part of this reduction occurred in the importing countries of Western Europe has brought about a distribution of supplies which is tending to increase world shipments of wheat during 1936-37. World wheat shipments during the crop year 1935-36 totalled a sum of only 520 million bushels. Estimated of world wheat requirements for the present crop year now range from 560 to 580 million bushels.

The Canadian wheat picture has also changed materially. On August 1, 1935, stocks of wheat in Canada stood at 200 million bushels. By the same date in 1936 the total had been reduced to 100.4 million bushels. This substantial reduction, coupled with the small crop harvested in 1936, reduced the exportable supplies to such an extent that it is unlikely that exports from Canada will be as high a percentage of total world shipments as they were in 1935-36. During that crop year Canada supplied almost fifty per cent of the total world import requirements.

The acreage seeded to winter wheat in the United States is estimated to approximate 57.2 million acres. This the largest acreage in history. Wheat acreages in other countries also remain at high levels and should yields in 1937 approach the normal figures of previous years, production would again be in excess of export requirements and stocks would again increase.

Potato production in Canada in 1934 was estimated at 30,000,000 cwt. and is only fractionally higher than in 1935 when the crop amounted to 28,670,000 cwt. Excellent yields in the Maritime Provinces, Quebec, northern districts of the Prairie Provinces and in British Columbia more than offset the low yields in Ontario and the southern districts of the Prairie Provinces occasioned by severe summer drought.

Afalfa seed production in Canada in 1936 is preliminarily estimated at approximately 2,100,000 pounds as compared with 1,100,000 pounds in 1935, and 1,650,000 pounds in 1934. Most of the seed was grown in Ontario, but substantial amounts were raised in Manitoba, Saskatchewan, Alberta, and British Columbia.

Farmers in Central China use oxen, water buffaloes, and donkeys for farm work while the farmers in North China employ camels, mules, and horses for transportation, and doublets and sleds for the more important work on the farms. Some Mongolian horse breeders exclusively for their wool, which in the same way as sheep in Canada.

Pedigree certificates of pure-bred animals registered by the Canadian National Livestock Record, approved by the Dominion Minister of Agriculture, during 1936 numbered 82,372. Of these 1,988 were horses; 38,112 cattle; 13,164 sheep; 9,200 swine; 6,929 flocks; 8,042 dogs; 2,826 poultry, and 108 goats.

## New Hat For Men

Worried because one man in every seven in London goes bareheaded, London hatters are introducing "a really featherweight hat weighing two ounces or less—so light that the 'hatless' brigade will hardly realize they are wearing headcovering at all," according to their announcement.

At a year old, the average child is said to have a vocabulary of seven words.

## Likes His New Home

**Man From Canada Enjoys Life In Carolina Swampland**

Marcooned in the bottom swamps of the Carolinas is a man from New Toronto. Since 1913 he has been living on the flats of the Santa Fe river, where his only neighbors are "poor whites" and Negroes. There, 1,000 miles from home, he has his plot of corn and beans a wife and children. Gradually he is losing any desire to return to his native Canada.

He was discovered by Dr. R. M. Saunders of the University of Toronto who tells of meeting him on an expedition into the Carolina swamps. "I forgot his name, but amongst the cracklers he is known as 'the man from Canada,'" said the doctor says.

He was once a bookman on the Grand Trunk Railway on the western Ontario run. He left Canada to take a position with an American line on the Atlantic seaboard. Then he lost his job and was stranded near Charleston. That is all Dr. Saunders knows of this ex-Canadian who makes his home in the swampland.

How the man came to marry and settle down among the "crackers" and the Negroes, he cannot tell. The standard of living is not very high; they live on corn pone and once in a while they catch a wild pig. Something keeps him there, perhaps it is the influence of the climate or perhaps his wife and children. Dr. Saunders doesn't know.

## Queen Of The Netherlands

**Governs Royal Household But Other Powers Are Limited**

Although Queen Wilhelmina does rule Holland with a free hand, it is agreed that she does govern the royal household with her husband. Apart from the home lessons in statecraft, Juliana attended the University of Leyden where she went into broader matters, especially law and economics.

But her mother's training is said to have stuck. About the country people say that the queen and her daughter hate dictators. They are known to be opposed to the Dutch Nazi movement which counts some 50,000 members.

Dutch sovereigns are limited in their powers, and it wasn't so long ago that there was a definite anti-monarchist movement in the Netherlands. The queen's simplicity, her middle-class manners and scrupulous observance of the constitution are credited with having run this movement aground. Not much has been heard of it since 1923.

During the depression years, Queen Wilhelmina continually reduced her appointments as well as those of her daughter and of her husband, who died in 1934. This saved the Dutch taxpayers several hundred thousand florins and was an act much commended upon by the people.

## Live Fowl Kept In Hotel

**Supplied Dinners For Mohammedan Ruler While In London**

When the Sultan of Selangor started back to his kingdom in Malaya after a visit in London a procession of servants carrying 15 pots of steaming chicken preceded him. When the Sultan arrived in London he and his beautiful young wife took a fancy to English chicken for dinner. To conform to the requirements of the Mohammedan faith it was necessary to keep live fowl at the fashionable and exclusive hotel where the court stayed. The birds were killed and prepared for the table by the sultan's own chefs from Selangor.

When he announced the date of his return the sultan decided to make a carry of all birds that remained, and set it while warm during the early stages of the journey. The Sultan of Selangor receives \$75,000 a year and rules over 500,000 people.

A fast tailor often will speak as many as 150 words a minute, according to estimates.

The treasure of the former emperors of China is valued at more than \$20,000,000.

## This Inventive Age

**Master Minds Still Working To Make Life Easier**

The one hundredth anniversary of the federal patent law now being celebrated discloses the comforting fact that America's master minds are still working to make life easier. Among the clever devices for which patents have been granted are:

A mechanical baited with cheese that automatically rings a bell to a rat's neck and turns him loose to frightened away his fellow.

A "pedal calibrator," by which tubes fastened to your mouth blow air into your shoes to warm you feet;

A coffin bell to be rung by an unhappy mortal who wakes up to find himself "dead" and buried;

A travelling washing machine, filled with suds and dirty clothes and attached to the auto's running board. All the laundry needs is to do is to drive his car over rough roads;

Life-saving suspenders, made of fireproof thread that can be unraveled to permit a man entrapped in a burning building to swing to safety;

A cylinder razor covered with sandpaper for wearing down the whiskers (if any);

A hair-raising mechanism for boring holes in bald scalps, into which hairs are planted;

Well, we think the patent law is a great thing. They laughed when Ben Franklin helped himself to a spot of lightning with a door key.—New York World-Telegram.

## Has Not Progressed

**Modern Conveniences Are Not Available In Kent Village**

Stansted (Kent) is only 23 miles from London, yet it has no gas, no electricity, no bus service, no village hall, no village constable, and no tax office.

It is nearly two miles to the nearest bus route, and if any of its 400 odd residents want to hire a car, they have to telephone to Wrotham, three and a half miles away. A few of the larger houses have their own plant for making electricity, but oil lamps are the chief means of illumination. It has only one shop and a post office is attached, but money orders have to be obtained at Farningham, which is a good half a mile from the centre of the village.

Dances are seldom held in the village, and whilst drives are almost as rare. Most of the young men have motorcycles, and go to neighboring villages—for their entertainment.

There are four public houses in Stansted, but they are about two miles apart.

The parish church dates back to the 13th century, and in the churchyard is a yew tree believed to be over 1,000 years old.

A Frenchman, Joseph Marie Jacquot, invented the loom which made possible mass production of intricately patterned fabric. It is reported for the comparatively low price of silken fabrics.

## Sure To Delight In Colors Bright

PATTERN 575

Imagine yourself enveloped in this soft cloud of warmth. A luxurious afghan indeed! It's sure to delight in three colors, specially since the flower motif is worked in a continuous row, need contrast "bring them out." The actual crochet is done in single or double thickness, and the rows of flowers at a time. It makes grand carry-with-you work, and would be feather-light in Bernatian yarn. In pattern 575 you will find directions for making the Afghan, an illustration of it and of the stitches used; material requirements, and some general directions.

To obtain this pattern send 20 cents in stamps or coin (coin preferred) to Household Arts Dept., Winnipeg Newspaper Union, 175 McDermott Ave. E., Winnipeg.

There is no Alice Brooks pattern book published

# Many Indications Point To A Definite Increase In World Trade Conditions

## Came Out Second Best

**Eagle Disappointed To Find Chicken Was Just Metal Bird**

The belief that eagles are gifted with piercing eyes, and hence with an exceptionally strong eyesight, seems to be a legend. Here's a story from Desio, Italy, which tells why.

A royal eagle frightened by the rifle shots of Alpine game hunters, flew down to the tiny sketch of a more secure refuge, situated over the village of Piana, the bird sighted above the houses. Seizing a good prey, the eagle swooped down with full wings and swift spirals, and began to beat furiously at the supposed prey. The one-sided fight lasted several minutes, and ended with the royal bird getting groggy, and with barely enough strength left to seek refuge in a bell-tower situated close to the scene of the fight.

The eagle had mistaken for a live chicken the metal weathercock which for centuries had been revolving on top of the church spire.

The disappointed bird came to still worse grief shortly thereafter when a hunter, who had witnessed the unequal fight from a distance, rushed with a shotgun to a roof across the birchy, and from there killed the eagle.

The bird, which had a 72-inch wing span, is an exhibit in the Desio museum.

Desio is the birthplace of Pope Pius XI.

**Where Coal Is Coal**

**Ton In Berlin Land Costs Purchaser Over \$100**

Rugrians who fret over winter coal bills would be content with their lot if they talked with A. G. MacKinnon, who has just returned to England after a two-year stay in Pangnirtung, Baffin Land.

One ton of coal up there costs over \$100, and most Rugrians could keep their coal bins warm and airy for that much.

Very little coal, of course, is used in the far north. Eskimos make their houses and their fuel consists of seal oil which they burn in lamps for cooking and for heat in their igloos. A little coal is used by the white men who live in the territory.

Dr. MacKinnon, with his wife, has returned from Pangnirtung, which is just on the rim of the Arctic, after spending two years there in the Anglican church hospital. He was sent north by the lands branch of the federal department of the interior.

For some years, he practiced his profession in Saskatchewan at Jordan and at Big River. For nine years prior to going north, he practiced in Manitoba.—Regina Leader-Post.

World trade appears to have definitely turned the corner and for the first nine months of 1936 was showing indications of recovery.

Recovery in world trade, however, has not kept pace with recovery in individual countries. This fact indicates that many of the forces which have impeded International Trade in recent years are still far from being removed.

It is encouraging to Canadians to notice that the trade of both Great Britain and the United States has been increasing, as these two countries form the principal market for Canadian export sales.

The question of International Trade conditions is carefully analyzed in the fourth annual Agricultural Situation and Outlook, which has been published by the Dominion Department of Agriculture and Trade Commerce.

Trade in agricultural foodstuffs has not recovered to the same extent as has been shown for some other products. This fact is attributed to the shift in production which has taken place in the countries normally considered as importers of agricultural produce. These countries, chiefly in Western Europe, have for economic, political, military and social reasons, encouraged the production of more home grown foodstuffs. This has been accomplished by the erection of high tariff barriers and the use of many new barriers to trade. In recent months there has been evidence of some relaxation of these trade barriers.

This change of attitude gives a somewhat brighter outlook to the world trade picture. Another feature which is tending to relieve the situation is the trade agreement policies being effected, chiefly by the United States and Canada.

The uncertainty of currency exchange has been a factor impeding world trade in recent years and the decision of France to devalue the franc, in co-operation with Great Britain and the United States, has had a settling effect on foreign exchanges.

For the fiscal year ended March 31, 1936, Canada exported agricultural products valued at \$290,488,000. This was an increase of 10.7 per cent over the previous year. Approximately 64 per cent of the farm materials exported go to Great Britain and 21 per cent to the United States.

## STRIKE POLL IS TO BE TAKEN BY RAILWAY MEN

Montreal.—A strike poll of 117,000 Canadian railwaymen was labor's answer to the MacLean conciliation board's majority recommendation of only partial wage cut restoration.

The threatened strike would completely tie up the Canadian railway system according to Howard B. Chase, chairman of the general committee representing 17 running trade unions which decided in a conference here to send out the strike ballots.

Flatly rejecting the board's majority report, the committee took the stand it would accept no agreement based on any formula relating to railway gross revenues as set forth in the report.

As soon as the decision was reached, union heads made immediate preparations to submit the strike poll to all but 10,000 of the unionized employees of the Canadian railroads. The excepted 10,000 consist of certain classes of Canadian National Railway workers affiliated with the Canadian Brotherhood of Railway Employees, who are negotiating separately with a conciliation board at Ottawa.

In "a very few weeks," according to Chase, chief of the Federation of Locomotive Engineers and Firemen, ballots should be sent and union leaders will know whether to call a general walkout or accept on behalf of the men gradual reduction of their 30 per cent. cuts to seven per cent. during this year.

The majority report of the three-man board, prepared by Mr. Justice MacLean, and W. Sanford Evans of Winnipeg, nominees of the railways, recommended partial and gradual restoration of cuts.

The plan provides for reduction of the cut to nine per cent. Feb. 1, another reduction to eight per cent. by Aug. 1, and a third to seven per cent. by Nov. 1, providing enlargement of these reductions if gross revenues of the railways exceeded certain sums in the meantime.

The minority report, presented by Fred Bancroft, Oakville, Ont., workers' representative, urged complete restoration of the wage cut by Nov. 1. Bancroft said company earnings should not be considered.

## Attacked By Wolves

**B.C. Woodman Had Narrow Escape**

**When Rifle Cartridge Misfired**

Atharko, B.C.—A thrilling tale of escape from death when attacked by a pack of seven wolves near this settlement 250 miles north of Vancouver was told by Ralph Edwards, veteran woodman and fur-breeder.

Edwards said he was on his way to Atharko from his home at Lone-some Lake nearby when he saw the wolves coming toward him.

Armed only with a .22 calibre rifle and carrying but few shells, Edwards waited until the leader of the pack was close to him before firing.

His deadly nearly proved fatal. The dogs, considerably enraged, and the wolves were almost upon him when the leader fell under a second shot.

The woodman managed to escape while the ravenous animals halted over their fallen leader.

### Favorable Investigation

Toronto.—The Toronto Academy of Medicine has forwarded a resolution to Sir Lyman Duff, chief justice of Canada and chairman of the trustees of the King George V. cancer fund, endorsing proposed establishment of a national committee to investigate climated cancer cures.

### Two Reckless Drivers

Toronto.—Constable William Thompson charged two motorists in police court. One with reckless driving for speeding at 85 miles an hour, and the other with reckless driving for traveling only 10 miles an hour. Both were convicted.

### Would Tighten Paroles

Ottawa.—Tightening of regulations in granting paroles to prisoners in penitentiaries, particularly those sentenced for crimes of violence, was urged upon Hon. Ernest Lapointe, minister of justice, by a deputation of police chiefs.

## Reject Amendment

### No Restrictions Will Be Placed On Performing Right Society

Ottawa.—Efforts to further the activities of the Canadian Performing Right Society were defeated in the House of Commons when, at the recommendation of Secretary of State Fernand Rinfret, an amending bill introduced by W. K. Easing (Con., Kootenay West) was rejected by a vote of 91 to 58. It was the first vote on the session.

The Canadian Performing Right Society, incorporated under Dominion charter, claims copyright control over nearly 3,000,000 musical compositions. It collects \$70,000 as a blanket fee from radio stations for use of these numbers. About \$60,000 a year from theatres, and exacts a minimum fee of \$5 for the dissemination of its numbers through loud speakers and phonographs records in lodge halls, rinks and such public places.

Mr. Easing's bill proposed two amendments. One would have made it necessary for the society to furnish to applicants for licenses to use their works a list of compositions to which it held title. The other would have abolished the fee for use of loud speakers and phonographs in lodges and such places.

## Ship Battered At Sea

### Norwegian Captain Reports Storm Worst Experienced In 50 Years

London.—Storms battered the Norwegian steamship Tilthorn reached the Thames from Vancouver without a foremast, its boats smashed in and most of its deck cargo of timber missing.

Captain R. Raasmussen said a four-day, mid-Atlantic storm was the worst he had known in his 50 years at sea. The steering gear and rudder were smashed by high seas, the crew's quarters were flooded, and the gale broke the wireless equipment and carried away the forecastle.

Temporary repairs were effected to the rudder and wireless after the storm blew itself out.

The Tilthorn was the second craft from Vancouver with a week to report a hammering from the storm. The British freighter Gedding Court reached Liverpool with two-thirds of her deck cargo gone, her mainmast smashed, the rear topmast lost overboard, ventilators stove in and deck rails partially stripped.

## Ruling Was Necessary

### Duty Exemption Does Not Include New Tires In Use

Ottawa.—Automobile tires on wheels and in use are not baggage but tires in the back seat are, the national revenue department has ruled. Hon. J. L. Isley, head of the department, told the House of Commons the ruling was due to the limitation of the \$100 duty exemption on goods brought back from other countries by Canadian travellers to goods "included in the baggage."

M. J. Coldwell (C.C.F., Rosetown-Biggar) told of a case where a man bought new tires for his car in the United States and at the border was compelled to take them off and drive his car across on the rims in order to get them in free.

Mr. Isley said the interpretation of the law had caused difficulty but the department could not stretch it to the point of regarding tires on a car as baggage.

## Paid Its Way

### Post Office Department Shows Bright Profit For 1936

Ottawa.—During the past year the post office department more than paid its debts, J. G. Elliott, postmaster-general, told the House of Commons. Last year's receipts were \$41,117,199, less \$6,516,164 paid to commission postmasters.

Total disbursements were \$30,100,000 but this did not take into account rentals and maintenance of buildings.

### Will Receive Honorary Degree

London, Ont.—Sir Josiah Stamp, noted British economist, will receive an honorary degree of doctor of laws from the University of Western Ontario at the June convention. He is expected to sail May 19 for New York coming directly to London with his wife.

## RESIGNS

Hon. Charles Cockcroft, Provincial Treasurer in the Aberhart Social Credit Cabinet, who has resigned. This is the second cabinet resignation in the Alberta Cabinet within a month.

## For New Outlook

### Hon. T. D. Patullo Speaks Of Attitude Of East Towards The West

Montreal.—People of eastern Canada, in the opinion of Hon. T. D. Patullo, would do well to search for a new attitude toward western Canadians.

Declaring western Canada underestimates the east because "most of us come from there," the British Columbia premier declared in a press interview that it was a waste of time trying to apply regional views, which the east seemed to be taken by, to westerners and western conditions.

"We are essentially individualists," declared the premier.

He suggested the atmosphere was becoming too bogged down with generalities about finances. The east, he said, still was thinking of the west as a peculiar problem, whereas westerners, with their own peculiar problems, were trying to move ahead profitably and sanely.

Referring to British Columbia, the premier said: "Undoubtedly the province is prospering, and that prosperity cannot be laid to any one industry. It is the result of a wide-spread development."

## Geological Surveys

Ottawa.—Last year 209 students took part during the summer in geological exploration work organized by the department of mines, Hon. T. A. Crear, minister of mines and resources, said in a return tabled in the House of Commons in reply to a question by C. E. Ferland (Lib., Joliette—L'Assomption—Montcalm). This number compared to 546 in 1935, 53 in 1934 and 25 in 1933.

## FLOOD VICTIMS FIGHT PESTILENCE

This sign above a Cincinnati emergency relief cafeteria, warning volunteers to wash their hands in solution, is graphic indication of the precautions taken to avoid a widespread epidemic as a result of unsanitary conditions following the flood.

## War Spirit Rampant

### Excludes All Considerations Of Morality In International Relationships

Toronto.—Unsettled conditions throughout the world were due to nations reverting to the pre-war conception of relationship between governments, said J. W. Dafoe, editor-in-chief of The Winnipeg Free Press, in an address to the Women's Canadian Club here.

"The post-war idea of the keeping of peace being an obligation upon all nations has been submerged," he stated. "It may return, of course, but for the time being that great idea has vanished from the world and we are back to a conception that excludes all consideration of morality in international relationships."

Before 1914 when conditions were just a Sunday school picnic compared with the maelstrom of empire, patriotism, ambitions and preparations existing at present.

"It is not possible to be optimistic," Mr. Dafoe said. "If the piling up of armaments, the regimentation of people and the constant interchange of threats between nations must continue, war is inevitable, given time, and perhaps it will come soon rather than later."

## Writ Seldom Used

### Man Held By Edmonton Court As Surety For Brother

Edmonton.—Taken into custody on a seldom-issued writ of fieri facias, William Sawchuk was held by police here. William had signed a \$100 surety for the appearance in police court of his brother Steve.

But Steve failed to appear when his name was called in court, so court officials decided to hold William until either the \$100 is paid or Steve returns.

Literal translation of fieri facias is "cause it to be done," but in this case it is a writ to collect a sum due the crown.

## Undersea Broadcast

Kinloss, Irish Free State.—Standing 300 feet below the Atlantic's surface on the hulk of the Lusitania, Captain John Craig will broadcast to North America May 7, the 22nd anniversary of the liner's sinking by a German submarine with a loss of 1,198 lives. The program will mark the climax of salvage operations begun after the wreck was located in October, 1935.

## Improvement Is Shown

Toronto.—Canada's per capita income improved 10.3 per cent. in 1936 over 1935, R. J. Wright, director of research of J. J. Gibbons Company, told a service club meeting here. The figure showed a total income increase of more than \$440,000,000, he said.

## UNITED AIR SERVICE SEEKING MAIL CONTRACTS

Ottawa.—Three air services whose operations cover all Canada, except the Maritime provinces have merged as United Air Service and are seeking federal government air mail and passenger contracts, Leigh Brintnell, prominent Western Canada airman, said here.

The new company is composed of Mackenzie Air Service, of which Brintnell is president, Wings Limited and General Airways.

With the bill for the proposed trans-Canada airway being prepared for presentation to the House of Commons, it was reported several other prominent Canadian air services have approached the government with a view to obtaining contracts to fly mail.

Speaking of the trans-Canada airway, Brintnell said good lighting, electric beacon service, emergency landing fields, radio beam and a well organized meteorological weather bureau were essential to successful operation.

He felt Canadian pilots could handle large transport or passenger planes with the necessary competence after a short training in flying instruments.

"The hazards of flying the Canadian north have developed expert pilots," he said. "Our pilots have proved as good as any pilots anywhere, and I feel confident they could fly a scheduled route without difficulty."

Modern high-speed planes would not necessarily require larger airport facilities, he said, contending the 200-mile-an-hour ships can land on any normal airport.

## Discuss Irish Questions

### Recent Conversations In London Were Of Informal Nature

Dublin.—His recent conversations with Dominion Secretary Malcolm MacDonald at London were informal, President De Valera told the Irish Free State parliament.

"The conversations ranged over the principal matters at issue between the Free State and Great Britain," he said in response to a question.

"As the conversations were informal, there was no question of arriving at any agreement on the matters at issue."

## Have Become Menace

### Antelope Are Damaging Farm Property In Southern Alberta

Lethbridge.—Antelope herds have become a menace to ranchers in southern Alberta.

Gaunt and hungry, their feeding grounds piled under deep snow drifts, the animals are wandering from their natural haunts destroying ranch and farm property and devouring hay stacks.

A herd of 30 was reported within a few miles of Lethbridge, the first time in years the animals have come so close to the city limits.

## U.S. Flood Loss

### Economists Estimate Loss Around Six Hundred Million Dollars

Washington.—United States government economists estimated the flood loss to business in stricken areas will total around \$600,000,000, based on loss of business, property and equipment, crippled trade and weakened purchasing power. The estimate did not include damages to homes and other losses of private individuals.

## Air Raid Insurance

London.—British property owners should be insured against bombing damage, according to Sir John Lorden. Presiding at the annual meeting of the National Federation of Property Owners and Ratepayers, Sir John said if a fleet of bombing aircraft appeared over some of Britain's towns, some of the delegates present would go into bankruptcy if no insurance scheme was evolved.

**Stony Plain and District.**

Mr L Kowensky, Grande Prairie, was a week-end visitor in Stony.

Gerald (Twin) Gannon is making a fine recovery from a major operation performed on him at the Royal Alexandra last week.

Inga Councillors hold their monthly meeting Monday next, February 15, in Secretary Best's office. On the Saturday following, the 20th, Inga ratepayers will hold their annual meeting in the town Hall, Stony Plain, when the Auditor's Report will be presented.

Another good film "The Important Witness" is billed for Kelly's Hall on Saturday Evg. next. The added attractions are said to be first class, and include Carrie Jacobs Bond, the celebrated singer.

Spring will soon be here, and with it the auto-driving season. If on the lookout for a good car, cast your glances on the list of reconditioned cars in another column which Sommerfield & Mayer are offering.

BUTTER AND EGGS WANTED at The Royal Cafe.

**Spruce Grove News.**

Mr and Mrs Herb Steffler were Sunday afternoon visitors with Mr and Mrs Jac Brox.

Due to the illness of Principal L L Piercy, the Spruce Grove High School has been closed for several days this week.

Spruce Grove was represented at the Banff Skii Tournament in the person of Harry McLeod. Harry was a member of the skiing fraternity which journeyed to Banff last week end, to attend the skii trials at Mount Norquay.

For some reason so far unexplained, the big mass meeting to have been held in the local Schoolhouse on Feb. 4th, and to have been addressed by Mr F M Baker, Social Credit M.L.A. for Clover Bar, was postponed.

Ratepayers of the Municipal District of Spruce Grove No. 519 will hold their annual meeting on the afternoon of Wednesday next, February 17. Nominations for Councillors will be received. The auditor's financial statement will be read and discussed.

**The World of Wheat.**

By H. G. L. Strange, Director Research Department,  
Searle Grain Co. Ltd.

Importing countries have bought much less wheat since the depression than they did in the good years.

For 5 years prior to 1929 the average yearly purchases of wheat by wheat importing countries was 784 million bu.

These purchases gradually decreased, until for 1934-5 only 537 million bu. were demanded, a decline of approximately 31 p.c.

Canada was the chief loser, her sales falling from an average of 309 million bu. per annum for 5 years prior to 1929, to 166 million in 1934-5, a decline of 46 p.c.

Argentina suffered less than others, her sales actually increasing during the depression years from an average of 151 million for five years before 1929, to 183 million for the year 1934-5, an increase of 17 p.c.

What did Canada do to lose more than her share of international sales?

What did Argentina do that enabled her to win new markets?

There would seem to be room here for a careful investigation and study.

Fortunately, things now appear to be somewhat on the mend, for Mr Broomhall estimates the importing countries this year will demand 568 million bu., and that Canada's share of these sales will be about 216 million.

In 16th century Paris, gingerbread was sold only by druggists. Royal edict gave pharmacists this monopoly.

## WEAK, LISTLESS, NO APPETITE

Troubled with Constipation, Couldn't Sleep; "Fruit-a-ives" Brought Quick Relief.

"For many years I was troubled with constipation," says Miss E. Johnson, St. Stephen, N.B. "I was weak, listless, had no appetite and could not swallow and I spent a good many nights of sleepless nights. Once I was so weak and almost at once was enjoying my food. My constipation improved right off. I began to sleep well again and night after night my tares were made from extracts of fruits and herbs. I am now strong and healthy. How of Mine! cleanse the elimination tract of the body and help to remove the waste of the blood stream of acids that often cause ill-health. For sale everywhere 25c and 50c in genuine fruit-a-ives."

## Thou Shalt Not Love

A NOVEL BY  
GEORGIA GRAIG

CHAPTER XVI.—Continued

That was the only thing she had not told Michael about. Tu Amena-Ra's curse she could not bring herself to that, thinking of what terror there would be in his eyes. She had told him much about herself, though, of her parentage, and mentioned that her father was an archaeologist who had taken her to Egypt with him, but that he was dead now, and she was alone.

Michael was astonished and pleased. "Ellison," he mused. "The Professor Bruno Ellison! Why, he was famous, Starr, darling!" He laughed exultantly. "Wonder what Stephanie and the rest of them who are living on the glory of ancestors who accomplished things in the dim past would think if they knew you were his daughter!"

In a way she explained how she had come to be in the La Lum that night, told of her loneliness and her yearning to see a little of life, the bright lights. Michael said:

"What an idiot of a bounder I was! I should have seen it the minute I clapped eyes on you... Perhaps I did, but in my stubbornness refused to see! Thank heaven all that's forgotten, Starr—I'll spend the rest of my life making up to you, if think if they knew you were his daughter!"

But in a way she explained how she had come to be in the La Lum that night, told of her loneliness and her yearning to see a little of life, the bright lights. Michael said:

"What an idiot of a bounder I was! I should have seen it the minute I clapped eyes on you... Perhaps I did, but in my stubbornness refused to see! Thank heaven all that's forgotten, Starr—I'll spend the rest of my life making up to you, if think if they knew you were his daughter!"

But nothing about the curse of Tu Amena-Ra! Nothing of the six months of life that had been given her!

Safe in the arms of a flesh and blood lover it was difficult to realize that she had ever allowed her life to be dominated by a three-thousand-year-old curse. This was Twentieth Century America. A million people would laugh off the curse of Tu Amena-Ra as mere foolishness belonging to a forgotten age.

But then, she remembered, a million people had never seen her father and Mr. Lessing did not know what was to become of her. Her lover would protect even in death, crumble into dust.

Feverishly Starr reasoned with herself. Trying to ascribe the deaths of the two men to natural causes. Neither of them were young—it had been a strenuous expedition—the bend could sap men's strength and energy... Trying to explain away her own physical and mental depression as due to the great natural course of modern women—nerves.

She reiterated to herself: "I can't hurt me now. It can't! I won't let it! I'll fight it for Michael's sake!"

Then startlingly came the first shadow to cut through her happiness. They had completed last touch with city life, with their friends, and with what everybody was doing. They had not even troubled to pick up the daily papers that were left scattered around the living room and on the porch. The old farm people noticed that and smiled. They knew what it was to live in a world apart.

Michael had gone to the village alone one morning and Starr, waiting for him in the living room, carelessly picked up a week-old paper that lay on a table in the pile. It thrust glaring headlines before her eyes.

"PLAY-GIRL" ELOPES  
MARRIED AT MIDNIGHT TO  
MICHAEL FAIRBOURNE, HER  
PUBLICITY AGENT

"Start! Ellison, New York's famous 'Play Girl' author of the alleged auto-biographical book that has had wide love affairs has eloped with the smart set with much conversation, eloped last night with Michael Fairbourne, who acted as her publicity agent for the publishing house of Tarzane."

The elopement was on the eve of Fairbourne's proposed marriage to Shirley, the most eligible girl in New York's oldest and most distinguished families, and the two were guests at a house party being given by Miss Dale in Fairbourne's honor at her beautiful Westchester home—

A sudden chill struck Starr in the middle of the night. Both of them had hit the paper hard. She did not want Michael to see it. It was too unpleasant a reminder of all they had run away from.

All in a moment grim fingers were reaching out from that other life,

## Do THIS FOR A COLD

Take 2 "Aspirin" tablets with a glass of water at first sign of a cold.

If throat is sore, take a single tablet with a glass of water. Dissolve 1 tablet dissolved in a glass of water.

Quick Relief with  
"ASPIRIN" Tablets

The modern way to treat a cold is this: Two "Aspirin" tablets. If necessary, repeat, if necessary, in two hours. If you have a sore throat with the cold, dissolve 1 "Aspirin" tablet in a glass of water and gargle with it twice. The "Aspirin" you take definitely will act to combat fever, aches, pains and the cold itself. The gargle will almost instantly relieve soreness and rawness of your throat. Your doctor, we find, will prescribe this modern way of treating a cold.

"Aspirin" tablets are made in Canada by the Bayer Company, Limited, of Wind-sor, Ontario.

Demand and Get—

**ASPIRIN**

trying to draw her back into the hideous merry-go-round. She shuddered. This farmhouse was so filled with beautiful, vivacious memories. And now... Lance—Stephanie—

She had not got around to being her cheerful self when Michael got back from the village. Just a little later he came in. He was carrying a pile of letters in his hand. He announced breathlessly:

"The Elspeth is definitely over the bridge and the feels the urge to get back to work!"

Then he laughed, slipping an arm about her shoulders as he sat down on the arm of her chair.

"Seriously, Starr, I'm afraid we'll have to cut short our stay in Paradise. I had no idea work could pile up as it has, and the old man is getting restless. There is no season of the year for extended—or unexpected—vacations. Do you think we can drag ourselves back to New York tomorrow?"

Swift alarm leaped into her dark eyes. She cried, looking up at him with tensed pleading:

## for stubborn COLDS

Melt one-half spoonful of Vicks Vapo-Rub in boiling water and make the steaming water. Inhale the steaming water for several minutes. (This is long continued inhalation.) Also rub the throat and chest at bedtime.

PROVED BY 2 GENERATIONS

I'm getting old. I haven't been able to find anyone else yet—or wanted to."

But Lance Marlowe had not changed, as Starr discovered in the next interchange. He never would change. She flushed deeply as he added in a whisper: "My yacht is being renovated. It may not be the proper season for it, but I'm sailing soon for Hawaii, alone." He looked at her oddly, and Starr recognized that in his mind she was still "Play-Girl." He could not reconcile any idea of "Play-Girl" being faithful, even though married. "I had hoped..."

### Found Fishing Profitable

Australian Pulled In Valuable Ornaments Which Had Been Stolen

Harvey Bachelor dropped his bent pinhook into the waters of Darenbin Creek, Northcote, Australia, and waited for a fish to bite.

He felt a tug at his lines and pulled in a silver ornament.

He tried again and pulled in another glittering piece.

Finally he took his catch—valued at \$800—to police where the articles were identified as lost from a Synagogue burglary.

Harvey was suitably rewarded by members of the community.

### An East Indian Flower

Owned By Chinese Girl Blooms After 16 Years

The delayed bloom of a flower owned by Miss S. Y. Chao, daughter of the manager of a Chinese newspaper in Shanghai, has just been witnessed after a lapse of 105 years. Known as the vapour, or, sometimes, East Indian flower, it is one of three specimens in the entire Far East, and has been in the Chao family for many generations. Some vapour flowers, it is stated, have been known to live as long as 800 years without blooming.

### Seed Exchange Plan

With somewhat more money available for the drought areas of Alberta, the seed exchange plan operated successfully during recent years will be continued during 1937. Basis of the plan is that farmers in Alberta may exchange ordinary grain for registered and certified varieties and, with certain limitations the Dominion will bear shipping charges.

The word electricity comes from the fact that amber, when stroked, attracts small objects, much as a magnet does. "Elektron" was the Greek name for amber.

## Will Carry Out Full Program

Denouncing the "blocking tactics" that he said are being practised by financiers and political parties, Premier Aberhart declared that the provincial government intends to do all within its power to carry out its full program, when speaking at the Prophetic Bible Conference service in the Strand theater in Edmonton, last Sunday evening.

In closing his address the premier said: "We want to assure you that whether we can accomplish all we had hoped to do in 18 months or not, it is our purpose to do all in our power to carry out our full program. We are determined to let nothing interfere with our endeavor."

## No Wonder Government Costs So Much.

The Simcoe Reformer, in its column "Editing the News," points out that Lieut-Colonel Steele, 46-year-old former member of the Radio Commission, where he served for a short time at a salary of \$8000, has recently been retired with a pension of \$3200 a year following the creation of the Canadian Radio Corporation. Should he live to the age of 77 he will have drawn \$100,000 of the people's hard-earned money, and during all the years he will not give anything in return to the State for the money received. Why should this gentleman get a single cent of pension?

It does not seem possible when this matter is brought out into the open that whoever is responsible for the pension can make it stick.

The cost of government in Canada cannot be traced to the members' salaries, altho this is quite an item, but rather to other causes, which, as a rule, can be traced to the departmental end of governments.

## Husbands had to do The Housework—

DOES Friend Husband use the quill pen of the nineties, make his journeys with a horse and buggy, work with out-of-date tools or use his brain for an adding machine? He does not! He uses up-to-the-minute labor-saving, time-saving and money-saving devices.

Put Friend Husband doing housework and what would happen? The bugbears of household drudgery would vanish in quick time. There would be more Electric Ranges, Refrigerators, Vacuum Cleaners, Washing Machines, Ironers, Floor Polishers, and smaller appliances installed in a few months than in all time past.

Friend Husband wouldn't worry about the increase in his electricity bill either! He would know that the savings in labor and time would more than pay for the cost of electricity used.

You'll find it to your own advantage to take hints from the business methods of your husband, to help you in the management of your home!

## Will Someone Page "Big Bill"?

Charging that too many people allow others to do their thinking for them, Drummond Wren, of Toronto, secretary of the Workers' Educational Association of Canada, while on a visit to Edmonton on Friday, is reported as saying: "It is because of this that demagogues of the platform, born in Europe and at home, have been able to sway people to the most insane policies which are unsound socially, economically and ethically."

## The Provincial Marketing Act.

Sweeping regulations dealing with the marketing of livestock may result from legislation to be proposed at the session of the Alberta Legislature, which opens Thursday, February 25th. According to reports, a bill will be brought in to provide for amendments to The Provincial Marketing Act.

One possibility is that of a levy on each animal marketed at packing plants in this province to meet the cost of officials or inspectors who would be appointed by the Government to superintend the weighing. For example, there are approximately one million hogs marketed annually in this province. A levy of 50 per animal would yield \$50,000, which would go a long way toward covering the costs of an inspection staff.
